R057 (FIBERS--- Non-woven Fabrics)

Abstract:

PURPOSE: To dispense with a supply system of cleansing liquid in a cylinder cleaning device by employing, for a cleaning cloth, a cloth which is impregnated with said cleaning liquid before it is installed in said cleaning device.

CONSTITUTION: A cleaning cloth 2 impregnated with a cleaning liquid is housed in a cylindrical casing 20 which has no permeability. The casing 20 is installed in a printing machine like a cassette. Although the casing 20 is sealed before the cloth is used, the cloth is drawn out from a slit 22 formed in the casing 20 when it is used. Lids 24 are provided at opposite end portions of the casing 20 in a manner to support a cloth supply roll 4 therethrough. (From: *Patent Abstracts of Japan*, Section: M, Section No. 952, Vol. 14, No. 147, Pg. 40, March 20, 1990)
